

PUBLIC TRANSPARENCY REPORT

2023

Gestion FÉRIQUE

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

FÉRIQUE Fund Management (also known as Gestion FÉRIQUE) believes that environmental, social and governance (ESG) issues must be integrated into its investment decisions because they can have a significant impact on society and the environment, while contributing to the risk and return objectives. FÉRIQUE Fund Management is committed to constantly doing more in this area.

FÉRIQUE Fund Management's approach to responsible investment is based on the following components:

1. Exercise our voting rights as shareholder;

We use our voting rights to promote ESG best practices, including issues related to the environmental impact (e.g., assessment, disclosure and management of environmental impacts), social issues (e.g., labour standards, community relations) and governance issues (e.g., independence of directors, diversity of board members), in order to promote economic sustainability.

FÉRIQUE Fund Management defines and applies a proxy voting policy.

Our Policy is based on three general principles:

- Long-term profitability
- Accountability
- Transparency

This Policy therefore allows FÉRIQUE Fund Management to reconcile two fundamental objectives: actively encouraging companies to behave more responsibly and protecting its clients' assets over the long term.

The Proxy Voting Policy and reports are available on Gestion FÉRIQUE's website.

2. Conduct shareholder engagement;

FÉRIQUE Fund Management's approaches to shareholder engagement are:

- Utilize the services of a specialized external firm to carry out targeted commitments in accordance with objectives and priorities established annually;
- Conduct collaborative engagements with other stakeholders on an ad hoc basis based on goals, available resources and effort required .

3. Hire managers and sub-managers who integrate ESG factors (environmental, social and corporate governance factors) into their investment analysis and decision-making process;
4. Align the FÉRIQUE Funds family with the Paris Agreement goals by aiming for carbon neutrality;

Carbon neutrality means that the greenhouse gas emissions of entities (companies or countries) associated with all investments in an investment fund will be reduced or offset in proportion to the amount invested (CO2/M\$ invested), so that the remaining emissions in the atmosphere can be naturally absorbed.

These activities generally apply to the entire FÉRIQUE Funds family and vary according to the characteristics of each Fund (for example, Funds that hold only non-voting investments such as money market securities, fixed income securities, and third-party mutual fund units, are not subject to our proxy voting activities). In addition, money market securities and third-party mutual fund units, are not subject to commitment efforts and our goal to align with the Paris Agreement at this time.

5. Offer thematic funds related to sustainable development.
The FÉRIQUE Global Sustainable Equity Fund and the FÉRIQUE Global Sustainable Bond Fund have thematic investment strategies that focus on specific themes related to structural changes and long term trends in sustainable development.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Each year, FÉRIQUE Fund Management works to refine its sustainable investment approach and improve the way ESG analysis is incorporated into its investment decisions. This is done through ongoing collaboration with all of our external portfolio managers, all of whom are all PRI signatories and share the commitment to the Principles. In addition, FÉRIQUE Fund Management is also proud to report the following achievements:

1. Inclusion in our Prospectus of a commitment to comply with the Paris Agreement by aiming for carbon neutrality (all greenhouse gas emissions) for the FÉRIQUE Funds family;

2.

Addition of a commitment from our portfolio managers to support our commitment to the Paris Agreement in the Investment Policy and addition of a target of at least 3 engagements with companies held in the portfolio related to this risk .

Our external portfolio managers choose the companies that should be engaged, and we are monitoring the progress through time.

3. For the first time, we reported the Carbon emission of our Equity Portfolios to our clients

4.

We are certified carbon neutral (all greenhouse gas emissions) for all of our operations as an organisation.

5. We submitted our first shareholder proposal at Imperial Oil

6. We have enhanced our annual assessment of responsible investment practices of our portfolio managers to evaluate their ability to manage the climate risk. For those with lower scores, we asked them to improve their investment process.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Over the next two years, FÉRIQUE Fund Management will seek to

1. Define interim targets for 2030 in line with our commitment to align with the Paris Agreement for the FÉRIQUE Funds.
2. Continuously improve our reporting in line with best practices.
3. Develop mechanisms to monitor and work with our different service providers and external portfolio managers in order to engage with companies that do not adhere to best practices..

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

(A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

We rely on our external portfolio managers to assess the climate risk of our investments. We have reviewed the different investment processes that our portfolio managers use, to manage our portfolios, to ensure that they were able to manage this risk. On a quarterly basis, we produce carbon risk reports on our portfolios to identify the main sources of exposure to risk and opportunity, which are then discussed with our external managers. On an annual basis, we review the investment process of our portfolio managers related to this risk as part of our review of their responsible investment approach. We have engaged with those portfolio managers that did not meet the minimum requirements.

If you invest in pooled funds, describe how you incorporate responsible investment aspects into the selection, appointment and/or monitoring of external investment managers.

Provide example(s) below

(A) Selection	For responsible investment aspects, we applied the same approach and criteria that we di for segregated account.
(B) Appointment	We will select the investment manager that is best suited to manage the mandate and integrate responsible investment aspects into their respective investment process. We currently have 3 mandates in pooled funds and all 3 managers consider ESG in their respective investment process, have stewardship and 2 out of 3 have net zero targets. As we cannot formalize our own ESG objectives or constraints in the IMA in the same way that we can in a segregated mandate, we work within the objectives and guidelines of the pooled funds.
(C) Monitoring	We monitor these strategies in the same way as our other strategies. The only difference is related to the monitoring of ESG objectives or constraints, which we will monitor in accordance with the guidelines of the respective pooled funds.
